INDIVIDUAL & FLEXIBLE

Hirt
LINE®

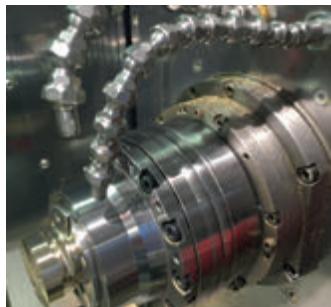

The Original Modular Hose System | Hirt-Line®

Our joint hose system can be extended as required, is stainless and offers a long service life. The individual parts are precision-manufactured and insensitive to heat and chemical substances. Can be easily screwed together, adjusted, lengthened and shortened by hand. Neither coolant pressure nor machine vibrations can change the position. Pressure resistant over 100 bar. Can be used on machine tools and production plants, mainly on turning machines, milling machines, grinding ma-

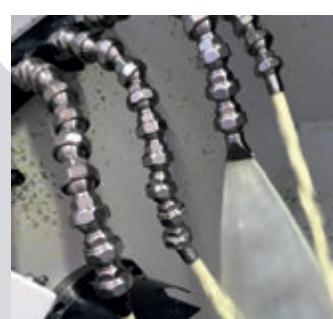

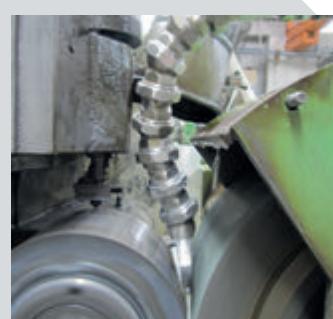

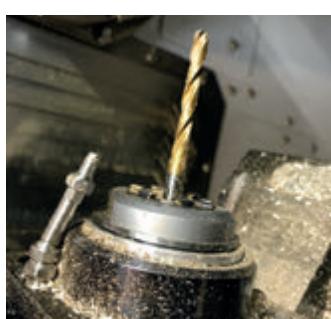

chines, sawing machines and filling plants. Suitable for emulsions, cooling and cutting oils, chemical substances and for air cooling.

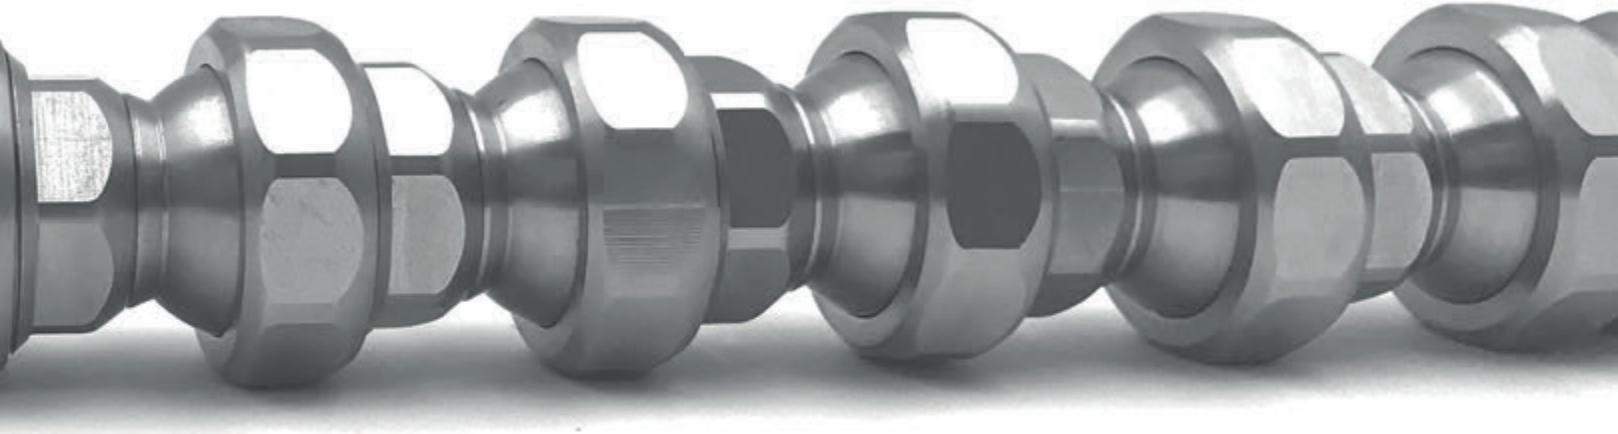

The Hirt-Line® system optimizes flow efficiency, reducing the need for pump power. This results in lower energy consumption and a noticeable decrease in electricity costs. You benefit from an optimized operation while simultaneously saving energy and expenses.

Properties:

- Jet precisely adjustable and fixable (screwable)
- Resistant to high temperatures, chemical substances, chips, pressure and vibrations
- Corrosion-resistant material 1.4305 V2A (on request in V4A)
- Wear resistant
- Pressure stable above 100 bar
- Application range -100°C to +300°C
- Without seal rings
- 4 system sizes, all among each other compatible
- Long service life
- Can be used directly on the tool (tool connections)
- Versatile in combination
- Sophisticated and effective assortment
- Applicable in the food industry and medical technology
- Connection elements for each machine
- Basic sets available in every system

Longer tool lifespans and less machine downtime for manufacturing systems

Although plastic joint hoses are very flexible coolant lines, they only offer the required operational reliability to a limited extent. Standard joint hoses are often misaligned by vibrations or chips and the coolant no longer gets to where it is

needed. Machine downtimes and even tool damage are expensive and can be avoided. Increase your productivity with our manufacturer-independent Hirt-Line® coolant and lubricant line system for turning, milling and grinding machines.

MADE IN SWITZERLAND is the quality promise of Hirt-Line®

We are committed to this through our own flexible production and high quality standards. Whether series production of

standard products or custom-made special solutions - we are here for you!

4 System sizes

Type0 | 1/8" | passage Ø 3,2 mm | thread M8 x 0,75

Type1 | 1/4" | passage Ø 5,8 mm | thread M14 x 1,0

Type2 | 1/2" | passage Ø 11,0 mm | thread M24 x 1,25

Type3 | 3/4" | passage Ø 19,0 mm | thread M34 x 1,25

All compatible with each other!

Machine adapter

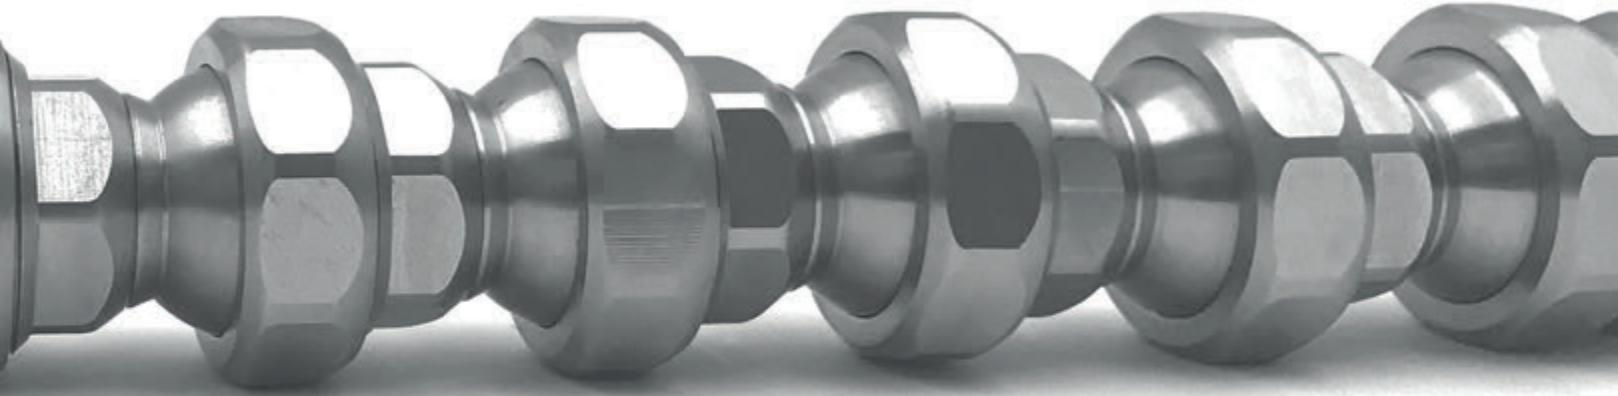

In addition to the standard pipe thread G1/8", G1/4", G3/8", G1/2", G3/4", G1" as well as metric threads M5 x 0,8 over M14 x 1,0 to M20 x 1,5, we also offer conical threads and ball head adapters with the dimensions of Ø10 mm, Ø12 mm, Ø14 mm, Ø15 mm, to various special adapters.

On request you will receive your special connection adapter!

Basic elements

3,2 mm, 5,8 mm, 11,0 mm and 19,0 mm inside diameter measure the basic elements of the Hirt-Line system. The variety of different standard lengths of 9.3 mm over 100 mm up to 1000 mm make a precise setting up and fixing the cooling jet to the desired place possible. And so make for an effective and easy customization. Other lengths on custom production possible.

Elbows

The Hirt-Line® system offers many different elbow elements in every system size, whether type 0, type 1, type 2, or type 3 we have the right e.g. elbows 90°, multiple connections, T- and Y-pieces. Due to the large selection, we ensure the greatest possible flexibility of the system. Special fittings on request!

Nozzles

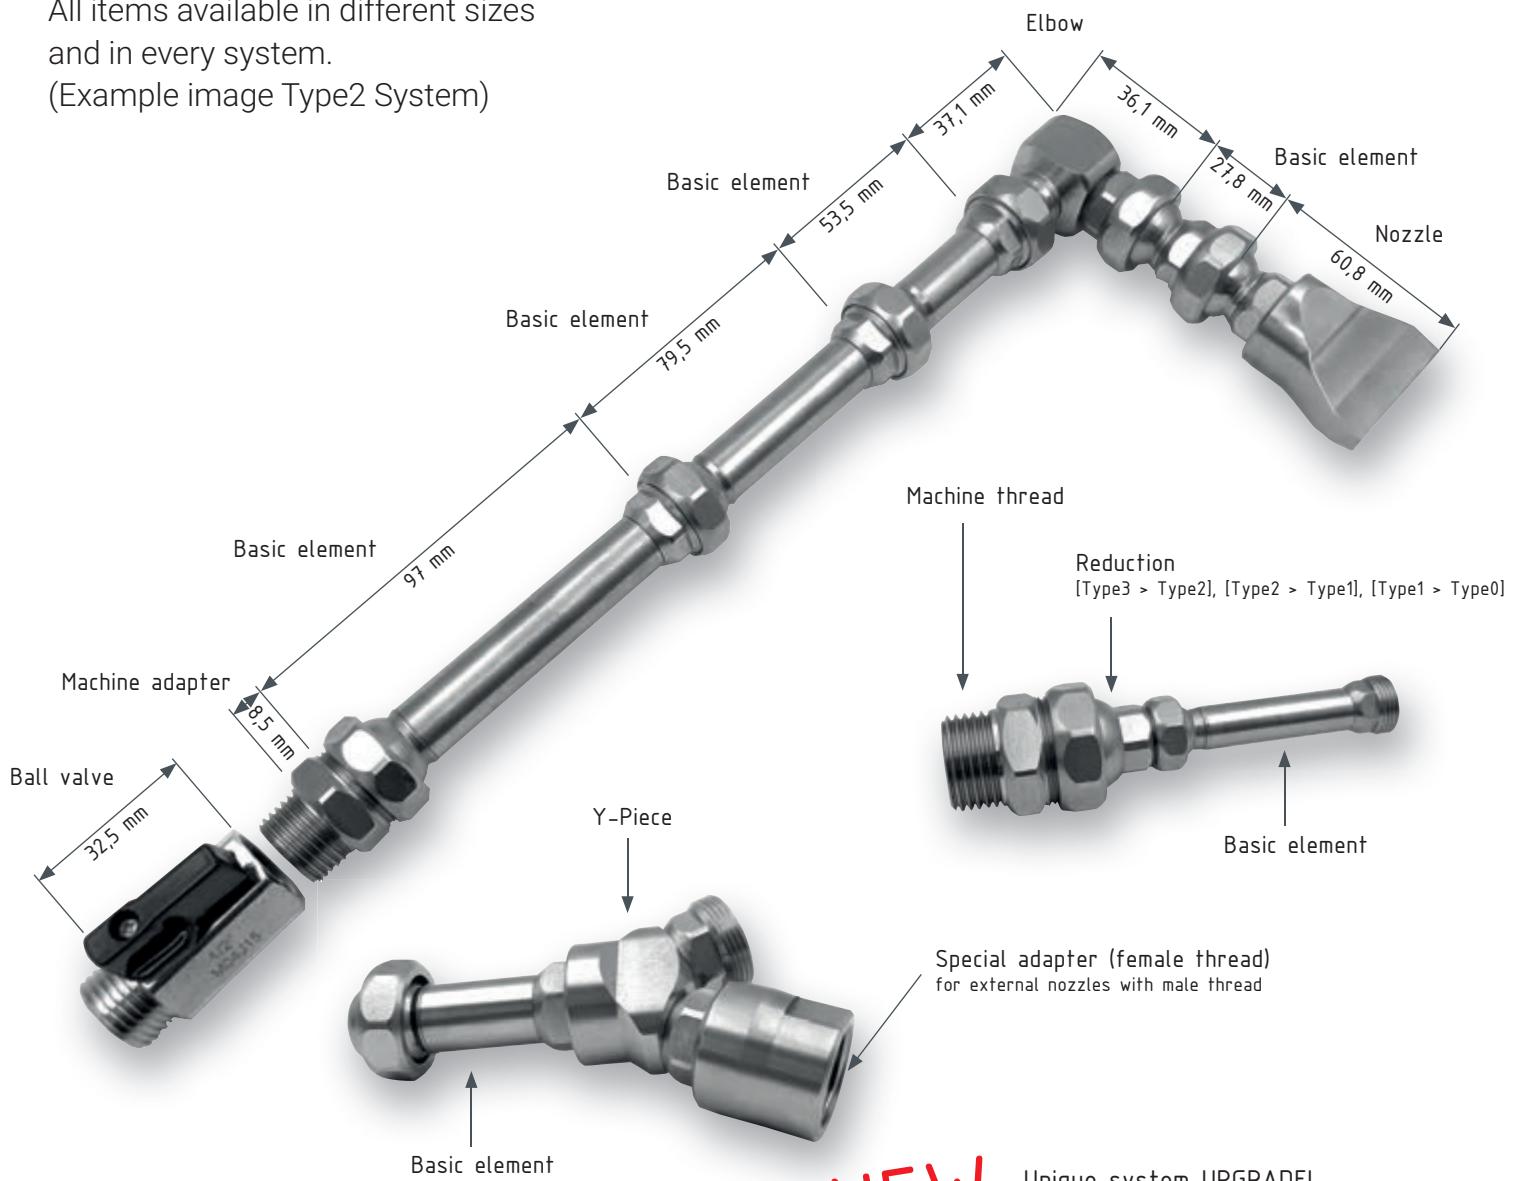

The nozzles made of a material 1.4305 (V2A) are insensitive to heat and are available from Ø0.5 mm, over Ø10.0 mm up to Ø19.0 mm passage. Our numerous flat nozzles with different slot widths leave nothing to be desired; ideally suited for washing or cooling as well as flat and cylindrical grinding. There are also some special nozzles, either with several holes or mini-slots. Optimized for perfect cooling!

Accessories

The Hirt-Line® accessories consist of our own products such as quick couplings, knurled nuts or locking caps, plus reductions to combine the individual systems with each other. We also offer suitable external articles, e.g. ball valves and open-end wrenches. With this range you ensure an optimal and stable coolant supply for the future, especially for individual applications.

All items available in different sizes
and in every system.
(Example image Type2 System)

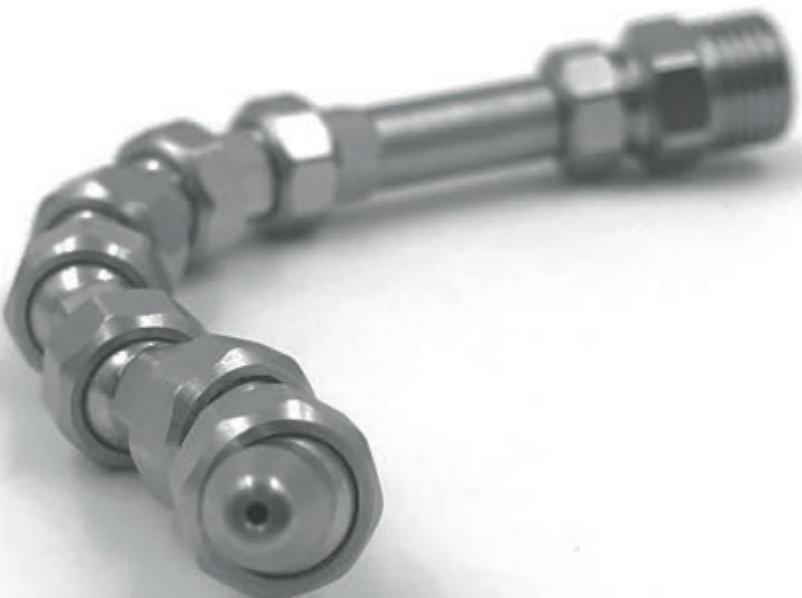

A construction kit, the convinces!

The Hirt-Line® system can be the basis for successful production. The basis for the system in turn are its individual components. Hirt-Line® makes all components and their data available here individually in order to give customers the opportunity to go their own way in the design and implementation of their systems. Hirt-Line® has compiled all its elements in a catalogue for quick and easy ordering.

PRODUCT OVERVIEW

Type0 [1/8"]

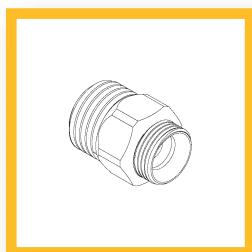

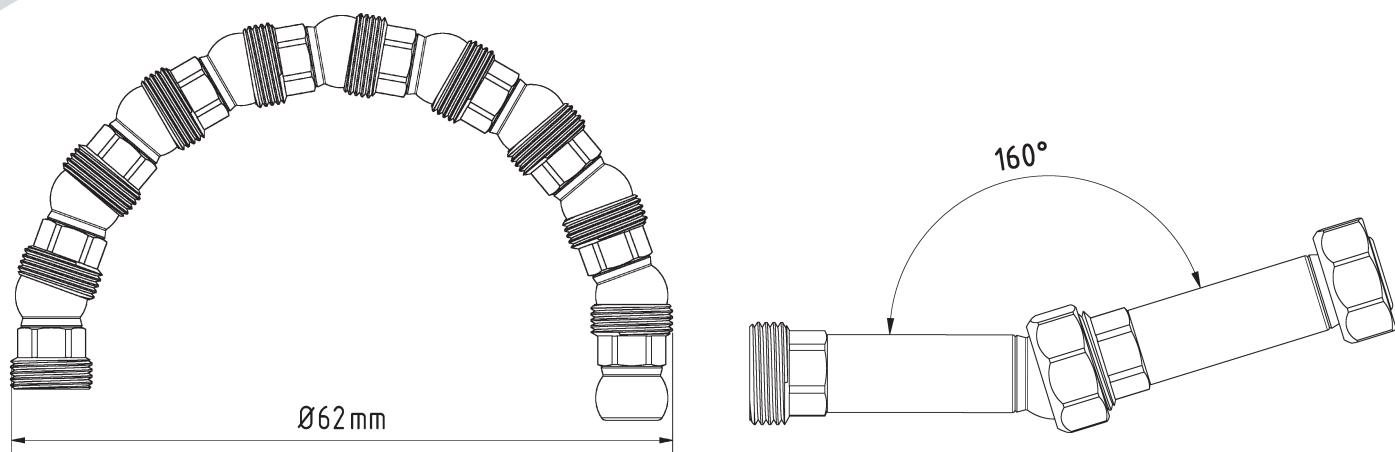

The latest Type0 system is characterized by easy assembly and straightforward setup on the tool. It includes a variety of nozzles ranging from Ø0.5 mm to Ø3.0 mm, as well as nozzles with multiple outlets. A comprehensive range of machine adapters, including M5x0.8, M10x1.5, and ball adapters with Ø10.0 mm, provides the user with the necessary flexibility and versatility. This is complemented by various base and angle elements, allowing for variable adjustments to meet the specific requirements of product processing.

PRODUCT OVERVIEW

Type1 [1/4"]

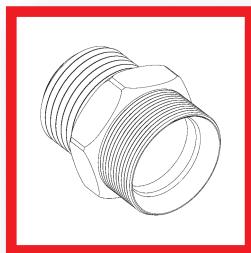

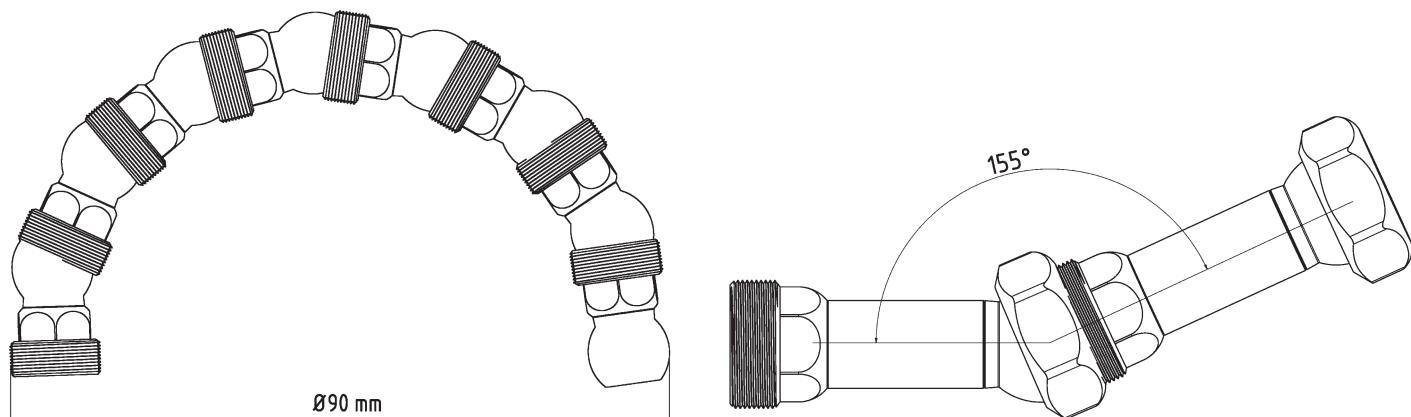

The Type1 system is designed for all machine applications with a maximum flow rate of ± 170 l/min. It includes round nozzles in sizes ranging from Ø1.6 mm to Ø5.0 mm, as well as a variety of flat spray nozzles and multi-hole nozzles, making it a standard for any machine. A comprehensive range of machine adapters, including G1/4", G3/8", metric adapters M8x1.0 and M14x1.5, and ball adapters, is available. Additionally, the system offers quick couplings and a variety of base and angle elements, ensuring a smooth installation.

PRODUCT OVERVIEW

Type2 [1/2"]

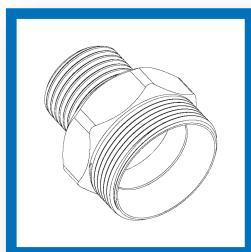

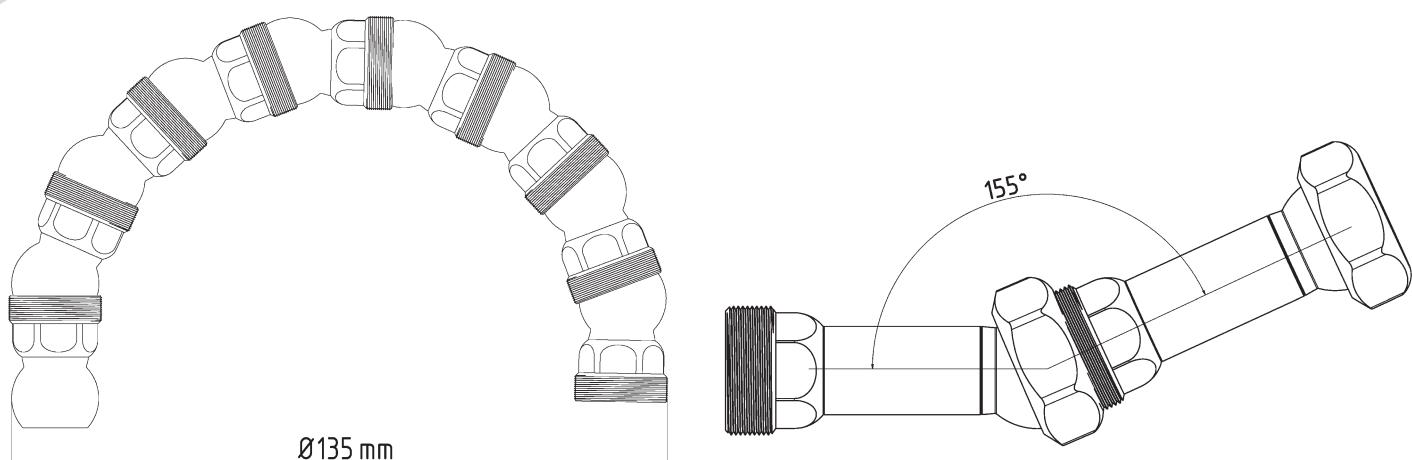

With the Type2 system you can optimize your machine process by $\pm 12\%$. Take advantage of the wide range of nozzles and adapt the cooling to your needs. Whether flat nozzles, round nozzles or nozzles with several outlets, for grinding, turning, milling or air cooling, you will find the suitable elements here. The Type 2 basic elements and machine adapters ensure a round range, which offers you the security of optimizing tool wear and guarantee stable cooling.

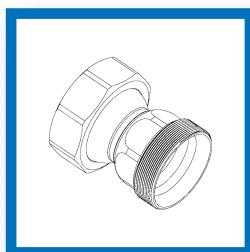

Type2 [1/2" System]

TECHNICAL SPECIFICATIONS:

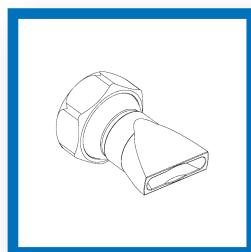

- Size Type2 (1/2")
- Passage Ø 11,0 mm
- Pressure resistant over 100 bar
- Application range -100°C to +300°C
- Thread (Elements) M 24 x 1,25
- Material 1.4305 (V2A)

INNOVATIVE NOZZLES FOR TOP PERFORMANCE

“ To achieve grinding results of the highest quality, optimal cooling is essential. Only slotted nozzles, as opposed to those with holes, meet these high requirements. This is because the coolant jet is drawn in between the workpiece and grinding wheel without turbulence, backpressure, or air inclusions. Hirt-Line® offers a unique selection of precision-engineered stainless steel nozzles for top-quality grinding operations, suitable for wheel widths from 18 to 121 mm and jet thicknesses ranging from 0.4 to 2.2 mm. ”

PRODUCT OVERVIEW

Type3 [3/4"]

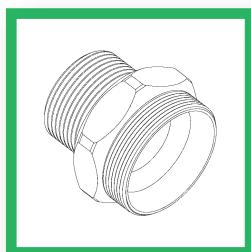

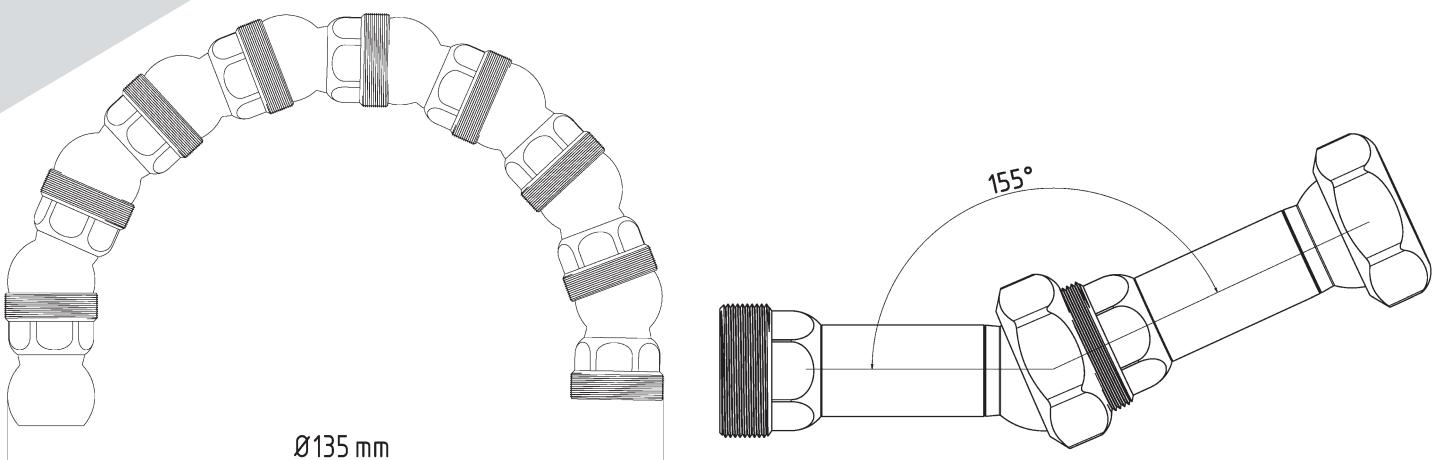

The system Type3 or also called 3/4" promises the suitable stability for your machines besides the proven and reliable quality. The 19 mm diameter diffuser provides the required litre capacity (over 200 l/min) precisely and stably (up to 100 bar) from the pump to the tool. Suitable in this system there are currently 32 different nozzles, from simple round nozzles from Ø12 mm, Ø15 mm and Ø19 mm up to the largest flat nozzle 121 mm x 2 mm which are also optimized for the grinding process. All nozzles are manufactured with high

precision and can be easily replaced for any application. With the 3/8", 3/4" and 1" adapters, it is easy to install this system on any machine. As usual, there are various basic and angular elements which allow the system to be configured flexibly and as required. Optionally a ball valve and further accessories can be acquired

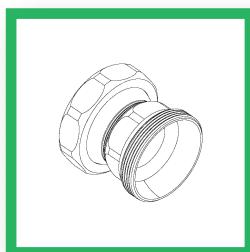

Type3 [3/4" System]

PROFESSIONAL EMULSION MIXING UNIT

The Filling Station for your
Machine Tool!

TAFAN 5000

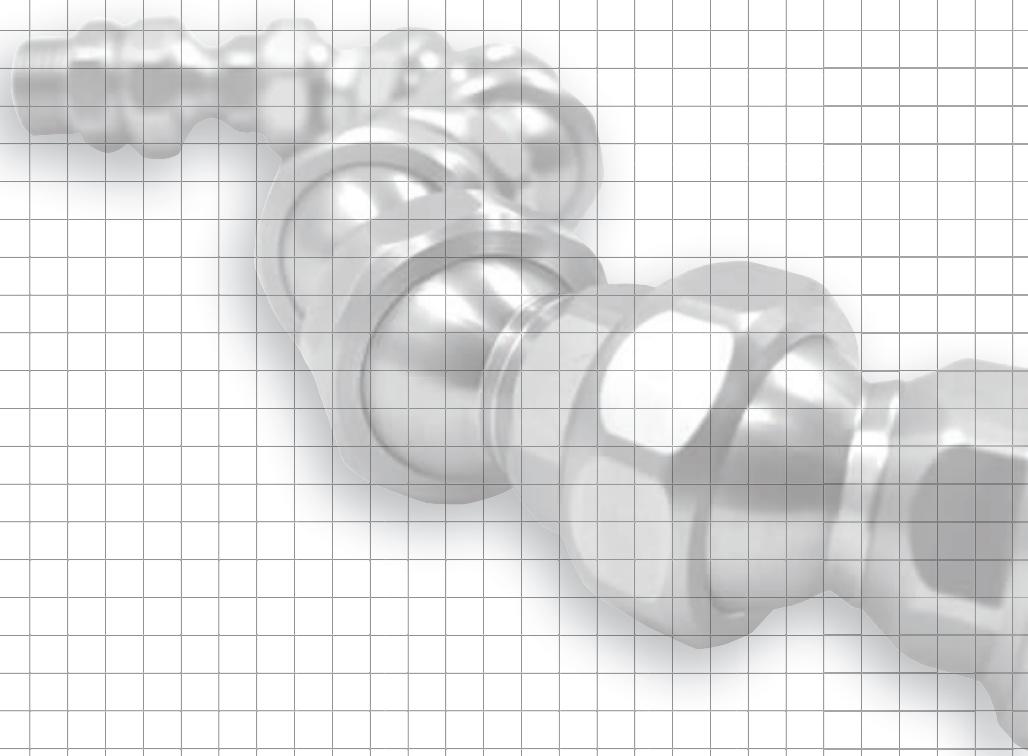

- no overflow (overflow protection)
- vacuum suction emulsion
- adjustable mixing ratio
- high pressure (fast fill)
- high life (stainless steel body)
- made in precision
- suitable for domestic water connection 2-8 bar

The professional filling station Tafan-5000 is perfect for professionally and quickly filling all types of machine tools. With our professional mixing device Tafan-5000, preparing machine emulsions and filling the systems can be done in one step.

Thanks to the self-priming (vacuum), the coolant concentrate is effortlessly drawn in and mixed with tap water to form the emulsion. The automatic dispensing gun prevents overflow at the machine.
